An inconvenient Truth: Rape & Sexual Offending is SEX Specific

Female pattern sexual offending, the exception that proves the male-pattern sexual offending rule

Sex is an exceptionally reliable demographic indicator and must not be erased from law and policy.

Nowhere is this more apparent than sexual offences. In Australia and New Zealand, males are responsible for 99% of convicted sexual assaults and the overwhelming majority of sexual assault victims are female.

This statistic is reproduced in Canada, United States, Switzerland, Ireland, Germany, England, Wales and Scotland. - Clare B Dimyon

The elimination of sex in law, policy, institutions and intimate spaces without broad consultation is reckless and dismissive of women who are on the receiving end of male violence.

In UK prisons, nearly half of trans-identified males are sexual offenders. This rate is significantly higher than the sexual offending rate amongst the non-trans male prison population.

Similar high ratios of sexual offending are found for trans-identified males in Canadian prisons.

Their crimes are being recorded as female crime. Paraphilias are overwhelmingly a male phenomenon. Paraphilias are 'frequent, intense, sexually arousing fantasies or behaviors that involve inanimate objects, children or non-consenting adults, or suffering or humiliation of the person or a partner'. <https://www.msmanuals.com/home/mental-health-disorders/paraphilias-and-paraphilic-disorders/overview-of-paraphilias-and-paraphilic-disorders>

A man may have more than one paraphilia. Fetishistic cross-dressing is a paraphilia, involving sexual gratification. <https://www.msmanuals.com/home/mental-health-disorders/paraphilias-and-paraphilic-disorders/fetishistic-disorder>; <https://transcrimeuk.com>

Other paraphilias are voyeurism, exhibitionism, sexual sadism, sexual masochism and paedophilia. Some men with paraphilias also have narcissistic or antisocial personality disorders.
